ABOUT ME

"Enthusiastic and motivated BCA graduate eager to contribute and learn in the IT industry. Strong problem-solving abilities and a passion for learning. Committed to contributing positively to any team."

ACADEMIC PROJECTS

1. IOT project- "Air Quality Monitoring and Alert System"
- Descriptions: Experience real-time monitoring and instant alerts, empowering you to navigate your surroundings with confidence. We utilized the Arduino IDE to code and retrieve real-time results from various sensors such as MQ135 and DHT11, ensuring accurate air quality data collection and analysis. We used Cool Term as the data storage.

2. CYBER-SECURITY project- "Steganography"
- Descriptions: I successfully developed a project that employs steganography techniques to conceal scripts and data within various media formats such as images and videos. This innovative solution enables the covert transmission of information while maintaining the outward appearance of the original files.

EXTRA CURRICULAR ACTIVITIES

Participated in "Photography" workshop conducted by "BRAND CREW Institute of Photography".

Participated in "TECH ENIAC" program conducted by "DEPARTMENT OF COMPUTER APPLICATION & TECH TRIBE" at Surana College.

SKILLS

- Time management
- Communication
- Problem solving
- Creative
- Project management
- Critical thinking

CERTIFICATES

- AWS Academy Graduate - AWS Cloud Foundations.
- Google Data Analytics.
- Python Programming 5 Days Bootcamp.
- Python training by Besant Technologies.

EDUCATION

M.sc in CyberSecurity

AMITY UNIVERSITY, BENGALURU

Pursuing

Bachelor of Computer Application

KLE SOCIETY'S DEGREE COLLEGE, NAGARBHAVI

Completed in 2023

70%

PUC(EBACs)

MANGALORE INDEPENDENT PU COLLEGE

Completed in 2020

57%
