PROFESSIONAL SUMMARY

Cybersecurity Intern with hands-on experience in deploying and managing IDS/IPS solutions, firewall administration, SIEM integration, and threat detection. Experienced in configuring Suricata, pfSense, OPNsense, and Wazuh to detect, analyze, and mitigate network security threats. Skilled in network traffic analysis, incident investigation, Linux administration, and security monitoring. Currently preparing for the CompTIA Security+ (SY0-701) certification with a strong interest in SOC Analyst and Blue Team operations.

PROFESSIONAL EXPERIENCE

Cybersecurity Intern

FCOOS Technologies Pvt. Ltd. | Bengaluru, India

March 2026 – Present

- Configured and managed Suricata and Snort on pfSense, OPNsense, and Linux servers for IDS/IPS.
- Developed and optimized custom security rules to detect and block P2P, TOR, social media, malware, SQL injection, and SSH brute-force attacks.
- Implemented IPS mode, country-based IP blocking, and network access control policies.
- Integrated Wazuh SIEM with Suricata and ELK Stack for centralized log collection and security monitoring.
- Performed network traffic analysis, alert investigation, and incident documentation using Wireshark and Linux.
- Converted Suricata rules to Snort rules while maintaining detection accuracy.
- Configured detection rules for large file uploads/downloads and ARP spoofing to strengthen network security.
- Maintained firewall configurations, security documentation, and project repositories using GitHub.

EDUCATION

MSc Cyber Security

AMITY University, Bengaluru | Expected Graduation: JULY 2026

Bachelor of Computer Application (BCA)

KLE Society's Degree College, Nagarbhavi | 2020 – 2023

PROJECTS

Suricata IDS/IPS Deployment & SIEM Integration

- Developed and tested 15+ custom IDS/IPS rules for detecting malware, SQL injection, SSH brute-force attacks, ARP spoofing, P2P/TOR traffic, and unauthorized network activity.
- Integrated Wazuh with Suricata and ELK Stack for centralized security monitoring and log correlation.
- Implemented firewall policies and IPS configurations to improve network threat detection.

SKILLS

- **Security Operations:** Infrastructure Monitoring, Security Monitoring, Alert Triage, Incident Investigation, Threat Detection, Incident Response, Root Cause Analysis, Log Analysis, Incident Reporting & Documentation, SLA Awareness.
- **Security Tools:** Suricata, Snort, Wazuh, ELK Stack, Filebeat, Wireshark, Nmap, pfSense, OPNsense, Git, GitHub.
- **Networking & Systems:** TCP/IP, DNS, HTTP/HTTPS, VPN, Firewalls, IDS/IPS, Linux, Windows, System Administration, Network Troubleshooting.
- **Cloud & Scripting:** AWS (EC2, IAM), Python, Bash Scripting.
- **Cybersecurity Skills:** SIEM Monitoring, Log Correlation, Firewall Configuration, IDS/IPS Rule Management, Network Traffic Analysis, Vulnerability Assessment, Security Hardening, Access Control, Threat Hunting, Malware Detection, SQL Injection Detection, ARP Spoofing Detection.

CERTIFICATIONS

- AWS Academy Graduate – AWS Cloud Foundations (Cloud & Security Basics)
- Python Programming Bootcamp
- CompTIA Security+ (SY0-701) – In Progress (Expected: 2026)
