ANJAN KUMAR S

JUNIOR SECURITY ENGINEER | CYBERSECURITY | VAPT | NETWORK SECURITY

+91 6363197226 | s.anjankumardikshith@gmail.com | Bengaluru, India | LinkedIn | Portfolio

PROFESSIONAL SUMMARY

Junior Security Engineer with hands-on experience in cybersecurity, network security, vulnerability assessment, VAPT, firewall security, security monitoring, and incident investigation. Experienced with Linux, networking, Python, Bash, PfSense, OPNsense,, Wazuh, Suricata, Snort, Nmap, Nessus, Wireshark, and Greenbone/OpenVAS. M.Sc. Cyber Security graduate with CompTIA Security+ certification.

PROFESSIONAL EXPERIENCE

FCOOS Technologies Pvt. Ltd. — Bengaluru | Junior Security Engineer | Sep 2026 – Present

- Work on network security, VAPT, vulnerability assessment, and security auditing to identify security weaknesses and improve system protection.
- Monitor and analyze security logs and network traffic using Wazuh, Wireshark, and tcpdump to detect suspicious activities and investigate security alerts.
- Perform vulnerability scans using Greenbone/OpenVAS, Nmap, and Nessus to identify open ports, outdated services, and security issues. Prepare reports with suitable mitigation steps.
- Configure, manage, and troubleshoot pfSense, OPNsense, and Sophos Firewalls, including firewall rules, access controls, network traffic, and connectivity issues.
- Use Linux, Python, and Bash scripting for security tasks, log analysis, system troubleshooting, and automation of routine activities.
- Support security audits and incident investigations by reviewing system configurations, analyzing findings, identifying root causes, and documenting remediation steps to reduce security risks.

FCOOS Technologies Pvt. Ltd. — Bengaluru | Cybersecurity Intern | Mar 2026 – Aug 2026

- Supported security monitoring by reviewing alerts, checking logs, and identifying suspicious network activities.
- Worked with Suricata and Snort to monitor network traffic and detect possible security threats.
- Used Wazuh and ELK Stack to review security logs, investigate alerts, and understand system activities.
- Used Wireshark and Nmap to analyze network traffic, check open ports, and troubleshoot network issues.
- Assisted with security testing and vulnerability assessment to identify weaknesses and suggest suitable fixes.
- Helped troubleshoot security issues and prepare technical documents, test results, and reports for future reference.

EDUCATION

M.Sc. Cyber Security | Amity University Bengaluru | 2026 | 8.11 CGPA

Bachelor of Computer Application (BCA) | KLE Society's Degree College, Nagarbhavi | 2020 – 2023 | 70.71%

CERTIFICATION

CompTIA Security+ (SY0-701) | 2026

TECHNICAL SKILLS

Security: VAPT, Vulnerability Assessment, Security Testing, Security Controls, Security Monitoring, Incident Investigation, Security Auditing

Networking: TCP/IP, DNS, HTTP/HTTPS, VLAN, ACL, NAT, VPN, Routing

Security Tools: Nmap, Nessus, Greenbone/OpenVAS, Wireshark, Burp Suite, Suricata, Snort, Wazuh, ELK Stack

Firewalls: pfSense, OPNsense

Systems & Scripting: Linux, Ubuntu, Kali Linux, Windows, Python, Bash

Documentation: Security Reports, Findings, Remediation, Technical Documentation

PROJECT

Network-Specific Threat Detection using Suricata -

- Implemented Suricata on pfSense for network threat detection.
- Created and tested custom detection rules and reviewed security alerts.
- Integrated Suricata alerts with Wazuh for centralized monitoring.

VAPT Testing -

- Performed Vulnerability Assessment and Penetration Testing (VAPT) using Greenbone/OpenVAS and Nmap.
- Identified vulnerabilities across web applications, servers, network devices, and services.
- Reviewed findings, assessed security risks, and prepared remediation recommendations.
- Prepared a client-facing VAPT security report with identified issues, impact, and mitigation steps.
